### PROJECTS

---

#### E-Commerce Website (Demo)

- Designed a basic e-commerce website layout using **HTML**, **CSS**, and **JavaScript** with **React** for the front-end
- Implemented static product listings and a functional shopping cart with quantity control
- Used **React Router** for navigation between product, cart, and checkout pages
- Practiced back-end structure setup with **Node.js** and **Express**, and explored basic database operations using **MongoDB**

#### Task Manager App

- Created a web app for adding, editing, and deleting daily tasks
- Built using **JavaScript** for front-end interactivity and state handling
- Used **LocalStorage** to persist task data locally across sessions
- Designed a clean, responsive interface to practice basic UI/UX layout and conditional rendering

#### Notes App

- Developed a web-based note-taking tool with features to **create**, **edit**, and **delete** notes
- Implemented **search and filter** functionality to find notes quickly
- Built with **HTML**, **CSS**, and **JavaScript**, optionally using **React** for better structure
- Stored data using **LocalStorage**, with plans to connect to a back-end in the future
